[Proceedings of the First Annual Conference of EFASA Held](#)

[at Zwai Fisheries Resources Research Center](#)

[Zwai, Ethiopia](#)

The Ethiopian Fisheries and Aquatic Sciences Society, EFASS,

(Amharic: *Ye'Ethiopia Ye'Asa ena Yewuha Sayins Balemuyawoch Mahiber*) is a professional association established and legally registered in May 2007. The Society has twelve founding members working on the Biology of fishes, fisheries and aquatic sciences. Ethiopia is endowed with plenty of inland waters comprised of various drainage systems that are home to a diverse array of fauna, flora and micro-organisms. The biota in these waters has neither been well-studied nor fully utilized through sustainable development activities. Rather, habitat loss and environmental degradation is ousting sustainable utilization and conservation of fishes and other aquatic resources.

EFASS is, therefore, established to contribute towards effective

implementation of research and development activities in fisheries and aquatic sciences in Ethiopia. This can be achieved through organizing problem- and solution-oriented conventions and for researchers, legal bodies and various target groups.

In this line, the representatives of **EFASS** would like to congratulate the Society's founders, and call fellow professionals and institutions to join the Society as members and assist in effecting the Inaugural Conference of EFASS, to be held at the beginning of 2008. Members of the Executive Committee of the Society will be elected during this historic conference.
